CONTENTS

CHAPTER		PAGE
I	Introduction	1
	Purpose	1
	Scope	1
	Sources of Information	2
	General Concepts	3
	Computer Modeling	3
	Methodology	5
	Definitions	5
II	Data & Design Criteria	6
	Drainage System	6
	Soils	7
	Precipitation	8
	Design Frequency	9
	Detention with New Development	11
	Hydrology and Hydraulics (as used in SWMM)	15
	Synthetic Design Storms	17
	Other Studies	18
III	Existing Drainage System	20
	Creeks, Pipes and Open Channels	20
	Culverts	21
IV	Proposed 'Full Development' Master Storm Drainage	22
	Creeks, Pipes and Open Channels	22
	Culverts	26
	Discussion	27
	Drainageway Access	27
	Recommended Additional Study	28
V	Recommendations	31

LIST OF TABLES

III-4 Existing Culverts, Capacities & Design Flows

IV-2 Peak Design Flows

LIST OF FIGURES

II-5 Rainfall Intensity-Frequency-Duration Curves

II-6 10 Year Synthetic Design Rainfall (Hyetograph)

II-7 10 Year Synthetic Design Rainfall

LIST OF MAPS

II-1 City of Sweet Home Watershed

III-1 Existing Drainage Pattern (inlcuded in Appendix C)

II-3 Hydrologic Soil Groups

II-6 Design Frequencies for Drainages

III-3 Locations of Existing Culverts

VI-1 Proposed Master Storm Drainage Plan

IV-2 Land Use Zoning in Proposed Comprehensive Plan

IV-3 Storm Drainage Plan Overlayed on City Topographic Maps (27 maps total)

APPENDICES

Appendix A "Design Frequency" Page 1-2, Oregon Department of Transportation Hydraulic Manual

Appendix B Contents of Notes and Calculations (submitted as separate binder)

Appendix C SWMM Parameters and Hydrographs for Existing Land Uses (submitted as separate binder)

Appendix D SWMM Parameters and Hydrographs for Land Uses shown in the Proposed Comprehensive Plan (submitted as separate binder)
